

Mint Asset Management Funds

Mint New Zealand SRI Equity Fund

Fund Update for the quarter ended
31 March 2021

This Fund Update was first made publicly available on 03 May 2021

What is the purpose of this update?

This document tells you how the Mint New Zealand SRI Equity Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Mint Asset Management Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

Typically invests in New Zealand listed equities and has an investment objective of outperforming the S&P/NZX50 Gross Index by 2% per annum, before fees, over the medium to long-term. The Fund is designed to meet specific responsible investment criteria, with the aim of building a portfolio where the holdings in aggregate, generate a better ESG score in our systems than the benchmark S&P/NZX50 Gross Index.

Total value of the fund	\$78,427,554
The date the fund started	12 October 2017

What are the risks of investing?

To determine the risk indicator, actual returns from the S&P/NZX50 Gross Index were used as this Fund has not been in operation for the required 5 years (inception 12 October 2017). As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of the Fund.

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	28.62%
Annual return (after deductions for charges but before tax)	29.16%
Market index annual return (reflects no deduction for charges and tax)	28.21%

The market index return shows the S&P/NZX 50 Gross Index, being the fund's relevant benchmark since inception and as stated in the Statement of Investment Policy and Objectives (SIPO).

Additional information about the market index is available in the Benchmark Indices document on the offer register at <http://www.business.govt.nz/disclose>.

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz/tools/investor-kickstarter.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the 5 years' period ending 31 March 2021. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

Risk indicator for the Mint New Zealand SRI Equity Fund:

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

Annual Return Graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 March 2021.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Mint New Zealand SRI Equity Fund are charged fund charges.

In the year to 31 March 2021, these were:

	% of net asset value
Total fund charges*	1.04%
Which are made up of -	
Total management and administration charges	
including-	
Manager's basic fee	0.86%
Other management and administration charges	0.18%
Total performance-based fees	0.00%
Other charges	\$ amount per investor
Other charges	\$0

*Fund charges are inclusive of GST

See the PDS for more information about the basis on which performance fees are charged.

Small differences in fees and charges can have a big impact on your investment over the long term.

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawal from or switching funds), although these are not currently charged. See the PDS for more information about those fees.

Example of how this applies to an investor

Annie had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Annie received a return after fund charges were deducted of \$2,916 (that is 29.16% of her initial \$10,000). Annie did not pay any other charges. This gives Annie a total return after tax of \$2,862 for the year.
